The CODAN™ 5700 series C-Band transceivers offer a wide range of distinctive advantages and enhanced features for satellite communications systems based in remote or challenging geographic regions.

Available in dual synthesiser, standard or extended C-Band operation and 70 or 140 MHz IF configurations—and a range of power outputs—the 5700 provides industry leading technical performance.

**KEY FEATURES**

**Durability**
The 5700 series is designed and tested to meet its performance specifications in an ambient temperature range from –40°C to +55°C and up to 100% relative humidity, ensuring long-term survival in extreme conditions.

The thermal protection provided allows operation up to +60°C ambient. Field experience shows that MTBFs of greater than 100,000 hours can be expected.

**RF performance**
RF performance is superb, particularly: intermodulation performance, gain stability over temperature and flatness across the IF band.

The 5700 also boasts industry leading spurious and harmonics specifications while guaranteed RF performance ensures expensive system link margins do not have to be used to cope with RF transceiver variations. The 5700’s high linearity and low spurious characteristics contribute to superior multi-carrier performance.

**Output power options**
Output ratings of 20 and 40 watts are standard, while higher power options are also available.

**Power consumption**
Codan’s C-Band transceivers all feature low power consumption and low temperature rise, ensuring internal components do not suffer undue stress.

**Power supply**
The 5700 features a 48 V DC floating input (37 V to 72 V range) with reverse polarity protection. This is ideal for battery backup and solar-powered systems. In addition, the 5700 may be supplied with an optional AC power supply unit with field selectable 115/230 V operation.

The AC power supply unit is extremely robust and particularly suited for operation from poor quality AC supplies.

**Internal protection**
Internal protection against high temperature and short or open circuit RF output is standard. As well, input voltage detection ensures reliable shutdown and restart under brownout or blackout conditions.

**External protection**
All user access is via a transparent cover, which can be removed without exposing major internal electronics to the elements.

Special sealant is used to ensure the sealing integrity of all connectors.

RF modules are fully sealed and pressure tested to 34 kPa (5 psi). Particle and moisture penetration is rated to IP68 and the units are submersible to 3 metres.
**ADVANCED FEATURES**

**Enhanced monitor and control**
All operating functions can be controlled and monitored via the serial interface. The operating configuration is stored in EEPROM to ensure the setup parameters are restored in the event of a power failure.

**Universal interface compatibility**
The 5700 has universal interface compatibility capable of operating with dumb terminals, laptop/PC emulating terminals, hand-held terminals and personal organisers without requiring proprietary software. The versatile configuration options support: contact closure, RS232, RS422 and RS485 (2 or 4 wire).

Two dedicated controllers are available from Codan:
- 5560 Hand-Held Controller, suitable for in the field installation setup
- 5570 Remote Controller, suitable for indoor rack mounting to provide permanent monitoring and control capabilities

**Redundancy switching system**
A redundancy switching system is available to provide an automatic changeover to a second transceiver to maximise link availability and minimise any disruption to service.

This system is fully outdoor mounted, but can be supplied with the 5587 Redundant System Monitor to provide indoor monitor and control.

</table>

Transmit/receive frequency control:
- D Dual synthesiser

**Bandwidth**
- N Narrow band (40 MHz) field selectable 70 or 140 MHz IF
- W Wide band (80 MHz) 140 MHz IF

**SSPA output**
- N N-type connector output
- W WR-137 waveguide output
- M SSPA monitor port only available on 10 and 20 W

**LNA**

**Options and accessories**
- Hand-held Controller
- Remote Controller
- Redundancy Switching System

**CODAN QUALITY AND SERVICE**

All C-Band transceivers are built and tested in Codan’s ISO9001 quality certified manufacturing facility, and undergo 100% burn in and performance monitoring over the temperature range specified.

Codan’s fully trained staff and agents provide in-factory and in-country training services, and complete installation and on-site assistance. This service is backed up by a 24 hour customer service line and a warranty of three years on manufacturing, design or component defects.

*Excludes mains related sidebands.
**LOW NOISE AMPLIFIER**

Indicative specifications: LNAs with lower noise temperatures are also available.

**Input**
- Interface: CPR229G
- Noise temperature: 40 K typical @ 25°C

**Gain specification**
- Gain: 50 dB minimum

**Output**
- 1 dB Gain: +5 dBm minimum
- Impedance: 50 Ω
- Connector: N female
- VSWR: 2:1 maximum

**TRANSMIT REJECT FILTER (OPTIONAL)**

Indicative specifications: TRFs to cover bands 2, 3 and 4 are available.

**Insertion loss**
- 0.05 dB maximum

**Rejection**
- 55 dB minimum

**POWER**

- **Input voltage**: 42 to 72 V DC (floating input) standard 115/230 V AC, ±15% with Power Supply Unit

**Power consumption**
- DC: 20 W, 40 W
- AC: 20 W, 40 W

- **Power supply unit**
  - Temperature: –40°C to +55°C
  - Relative humidity: 100%
  - Cooling: Convection
  - Weatherproofing: Sealed to IP65

**M O N I T O R  A N D  C O N T R O L**

**LNA interface**
- DC output: +15 V @ 75 to 400 mA
- Alarm input: Current monitoring as specified, and contact closure; O/C is fault condition

**Control panel facilities**
- **Indicators**: Standby, On, Warm-up, SSPA activated, Converter fault, LNA fault, SSPA fault, Temperature fault, Fan fault
- **Controls**: Power control (off/standby/on), SSPA control (inhibit/remote/activate), Serial interface settings, LNA supply via Rx RF Input connector, Mains/Battery supply select

**Remote monitor and control facilities**
- **Serial interface standards**: RS232, RS422 (RS485)
- **Protocol standards**: ASCII, Packet (RS485)
- **Packet protocol address range**: 0 to 127

**Control panel functions**
- Power control (standby/on), SSPA inhibit control, SSPA activate control

**Remote monitoring functions (serial interface):**

**Remote control functions (serial interface):**

**Remote monitoring functions (contact closure):**
- Standby, Warm-up, SSPA activated, Converter fault, LNA fault, SSPA fault, Temperature fault, Fan fault

**Remote control functions (contact closure):**
- Power control (standby/on), SSPA inhibit control, SSPA activate control

**ENVIRONMENTAL**

- **Converter module and SSPA module**
  - Temperature: –40°C to +55°C
  - Relative humidity: 100%
  - Cooling: Convection
  - Weatherproofing: Sealed to 34 kPa

- **Power supply unit**
  - Temperature: –40°C to +55°C
  - Relative humidity: 100%
  - Cooling: Convection
  - Weatherproofing: Sealed to IP65

**PHYSICAL**

All dimensions are measured over the connectors.

**Size**
- Converter module: 110 mm W x 410 mm D x 240 mm H
- SSPA module, 20 W and 40 W: 165 mm W x 415 mm D x 215 mm H
- Waveguide output option: 165 mm W x 420 mm D x 215 mm H
- Power Supply Unit: 200 mm W x 160 mm D x 370 mm H

**Weight**
- Converter module: 8 kg
- SSPA module, 20 W or 40 W: 9 kg
- Power Supply Unit: 10 kg
