# Practical Problems

---

## ■ MSC/BSC

**2%** of sites have a severe disaster each year

**40%** of disasters take 12 hours or longer time to be found out from sign to occur.

**60%** of them can be identified and recovered within 24 hours.

## ■ BTS

**65%** of downtime or failures is caused by power facility problem.

**85%** of failure take 12 hours or longer time to be found out, almost via subscriber complaint, or routine inspection by maintenance team.

**80%** of them take more than 24 hours to identify and recover on site.

# ***What We Can Do***

---

- Monitor the operation status in real-time
- Response the emergency quickly
- Prevent disaster proactively
- Manage maintenance work-flow efficiently
- Integrate and unify various alarm systems
- Simplify statistics, plan and report
- Optimized design for telecommunication infrastructure
- Reduce operation cost

# PSEM Architecture

**2-Layers**  
*for initial phase*

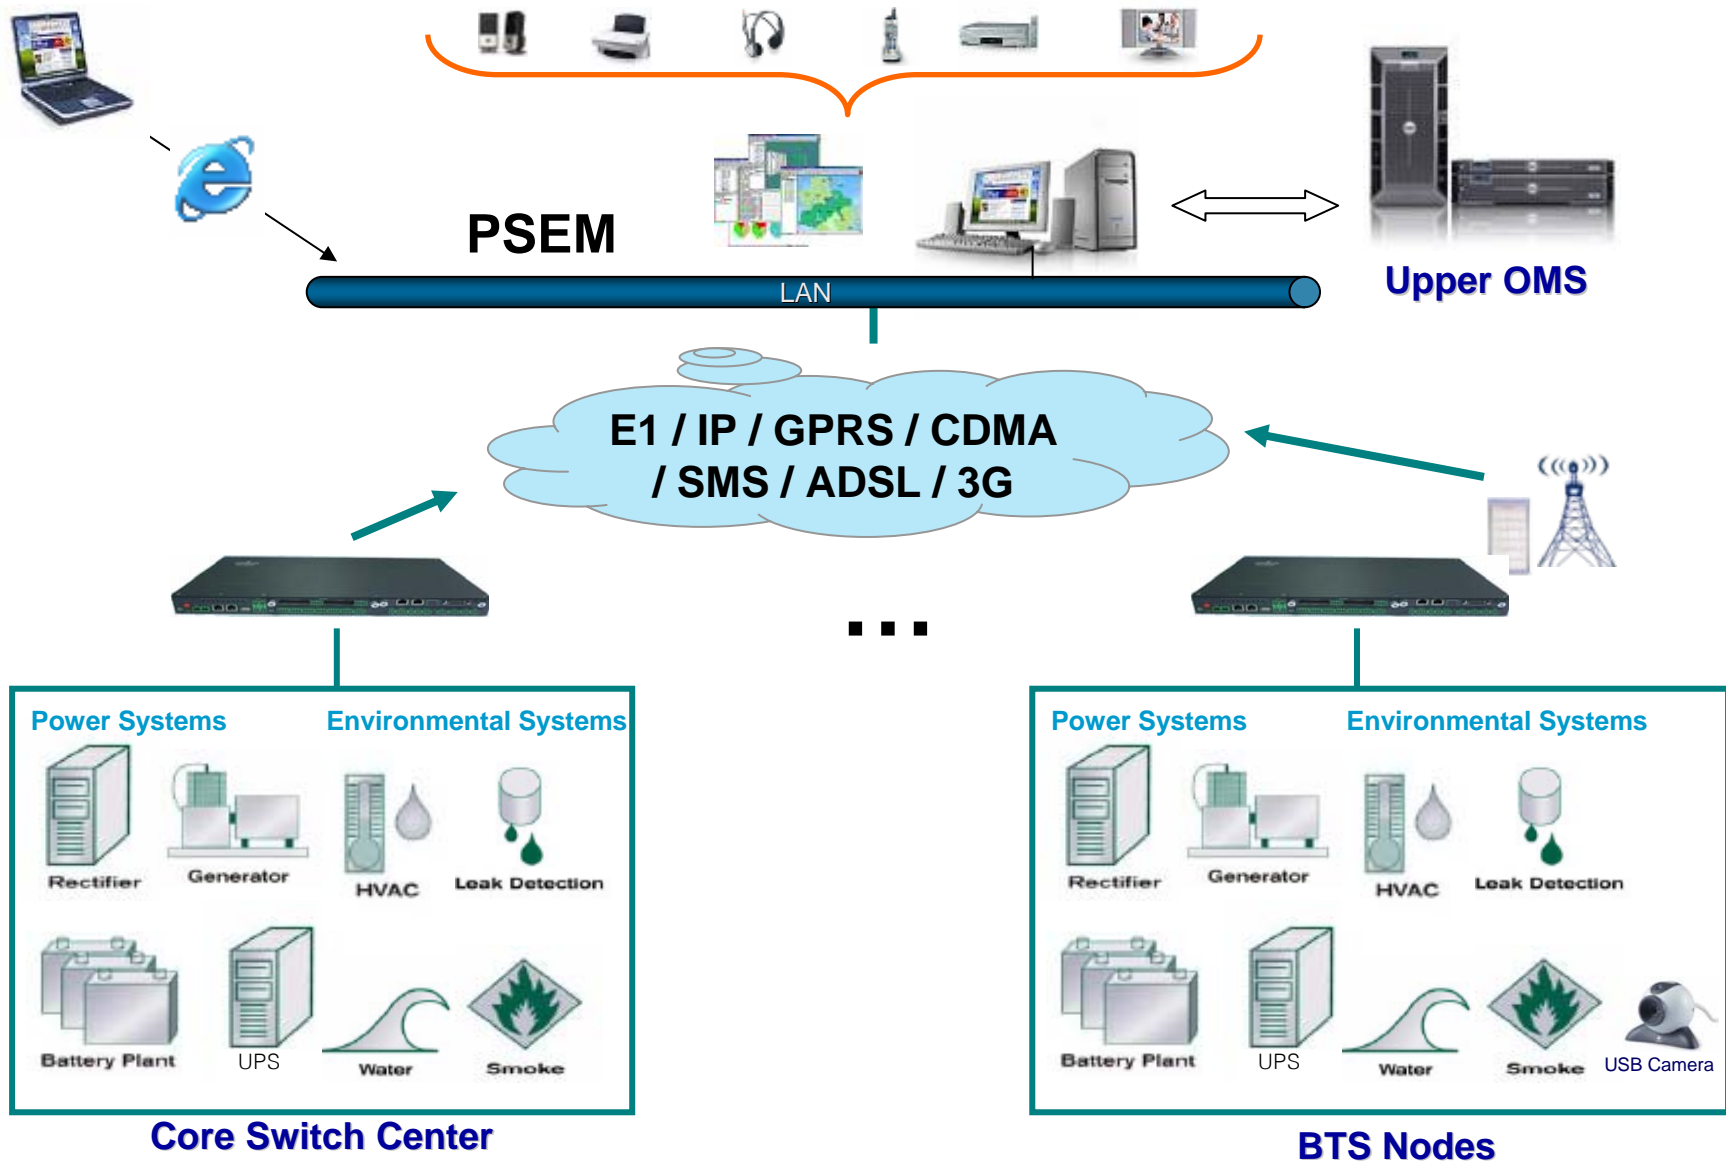

**3-Layers**  
*for network expansion & operation*

SC: Supervision Center – Network Management and Operation Center  
SS: Supervision station – Routine Maintenance Center  
SU: Supervision Unit – MSC / Transmission / BTS sites  
SM: Supervision Module

# Telecom Application

# Site Controller – IDU

**IDU: Integrated Data Unit processes all data from intelligent equipments and sensors.**

# Optional Module for IDU-HOST

**IDU-BAT module:** Each battery monitoring module for 24/48 cells of battery. Can support 2V/6V/12V battery voltage signal.

Battery

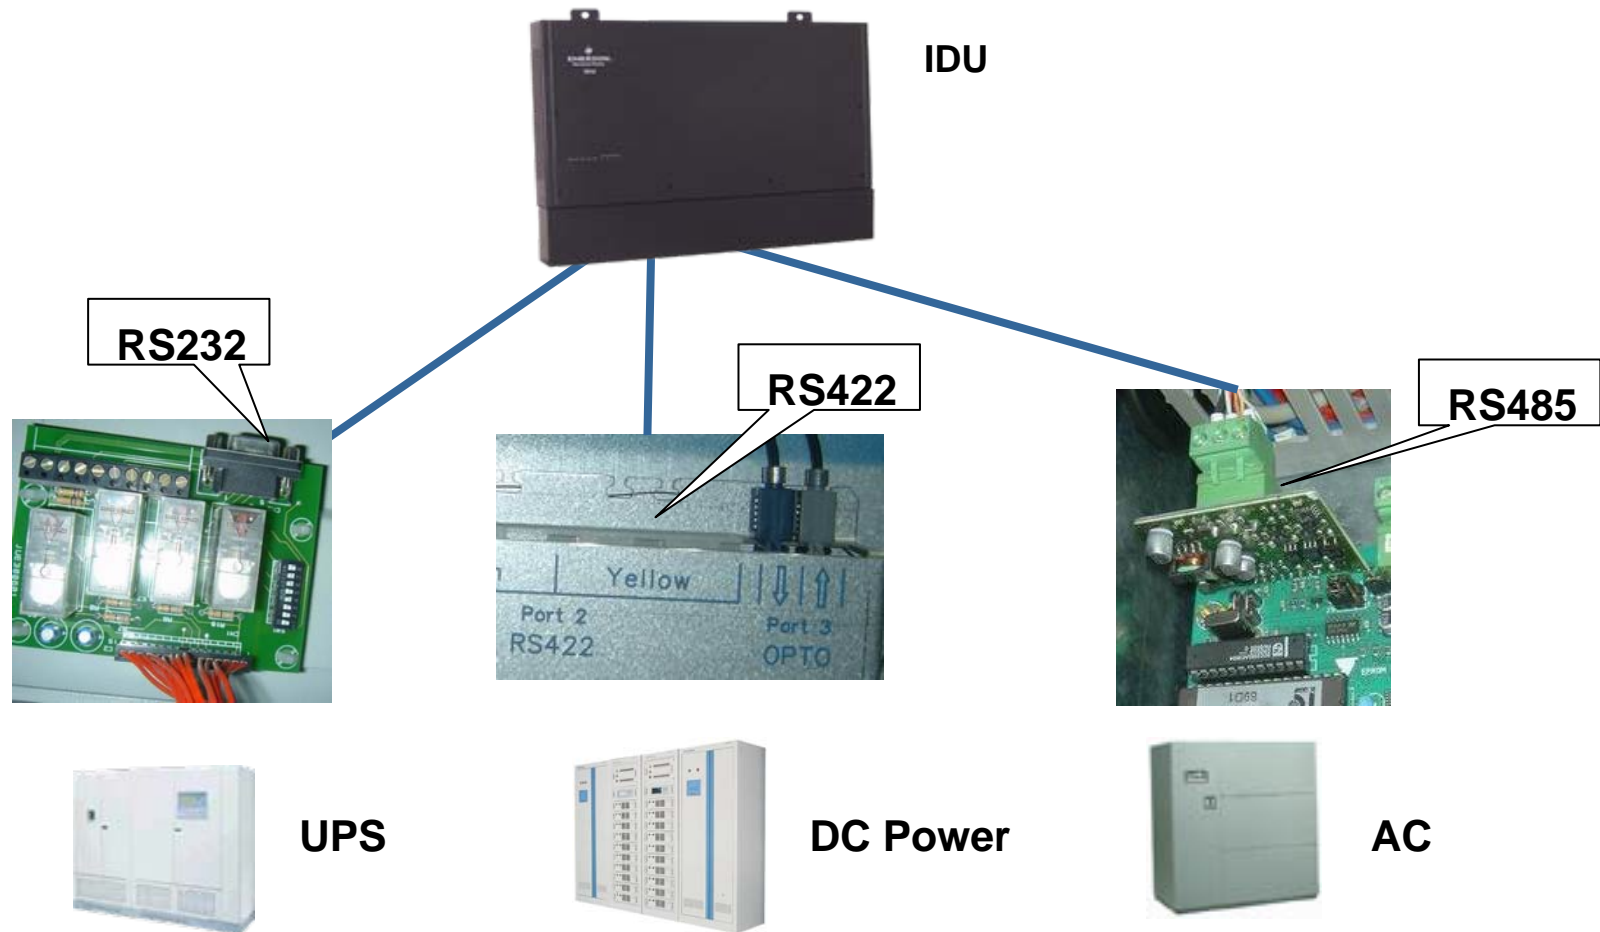

**IDU-COM module:** Each com module provides another 4 serial ports for intelligent equipment.

**IDU-BRG module:** Transmission function module for E1 transmission. Must be configured when using E1.

1. Only 2 optional modules can be configured in 1 IDU simultaneously.
2. Only 1 BAT module or COM module can be configured when using E1 for using 1 BRG module.

# Monitoring of Intelligent Equipment

IDU-Host has 4 serial ports, which is used to connect intelligent equipment into the system.

# ***Intelligent Equipment Supported***

---

## **●DC power:**

Emerson (including legacy products from Ericsson, Huawei, Nortel, Marconi), Eltek, Delta(Ascom), PowerOne, Benning, Switchtec, Saft, Argus...

## **●UPS:**

ABB(APC), Liebert, Delta, Exide, MGE, Chloride...

## **●Air conditioner:**

Liebert (Hiross), RC, Atlas, AirFlow, Isovell, UN, DaiKin, Denco, Stulz, AireDale, Emicon ...

## **●Generators:**

Caterpillar, Cummins, Wilson, Simpson, Galaxy, Detroit, Auto ...

## **●others:**

***PSEM is able to monitor over 800 types of intelligent devices in addition to Emerson equipment.***

**Note: The protocol of 3rd part equipments shall be provided by Operator.**

# Monitoring of Non-Intelligent Equipment

IDU-BAT module : Battery monitoring module for 2 groups (48- cell volt. 2-current, 2-total volt.). Can be extended to 2 IDU-BAT modules for 4 groups in each IDU.

Battery

E1 / IP

IDU

IDU-IO channel :  
16 -channel AI, DI  
4 - channel DO

Environment sensors

# Generator set

## Intelligent Generator

	Vendor
1	Caterpillar
2	Stamp Ford
3	Deutz Genepack

## Non-Intelligent Generator

# Diesel Level for Generator

Mode1: Throw-in type Sensor

$$H_{\text{Real oil position}} = H_{\text{Measured oil position}} - \Delta H$$

# Rectifier

## Intelligent Rectifier

## Non-Intelligent Rectifier

	Vendor
1	Emerson
2	Ericson
3	Siemens
4	Power One
5	Saft - Nife
6	Benning
7	SPS-2180
8	Alcatel
9	Harrif

# PAC

## Intelligent PAC

Interface card

RS-232/422/485

IDU

To Host

	Vendor
1	Liebert
2	RC
3	Hirros

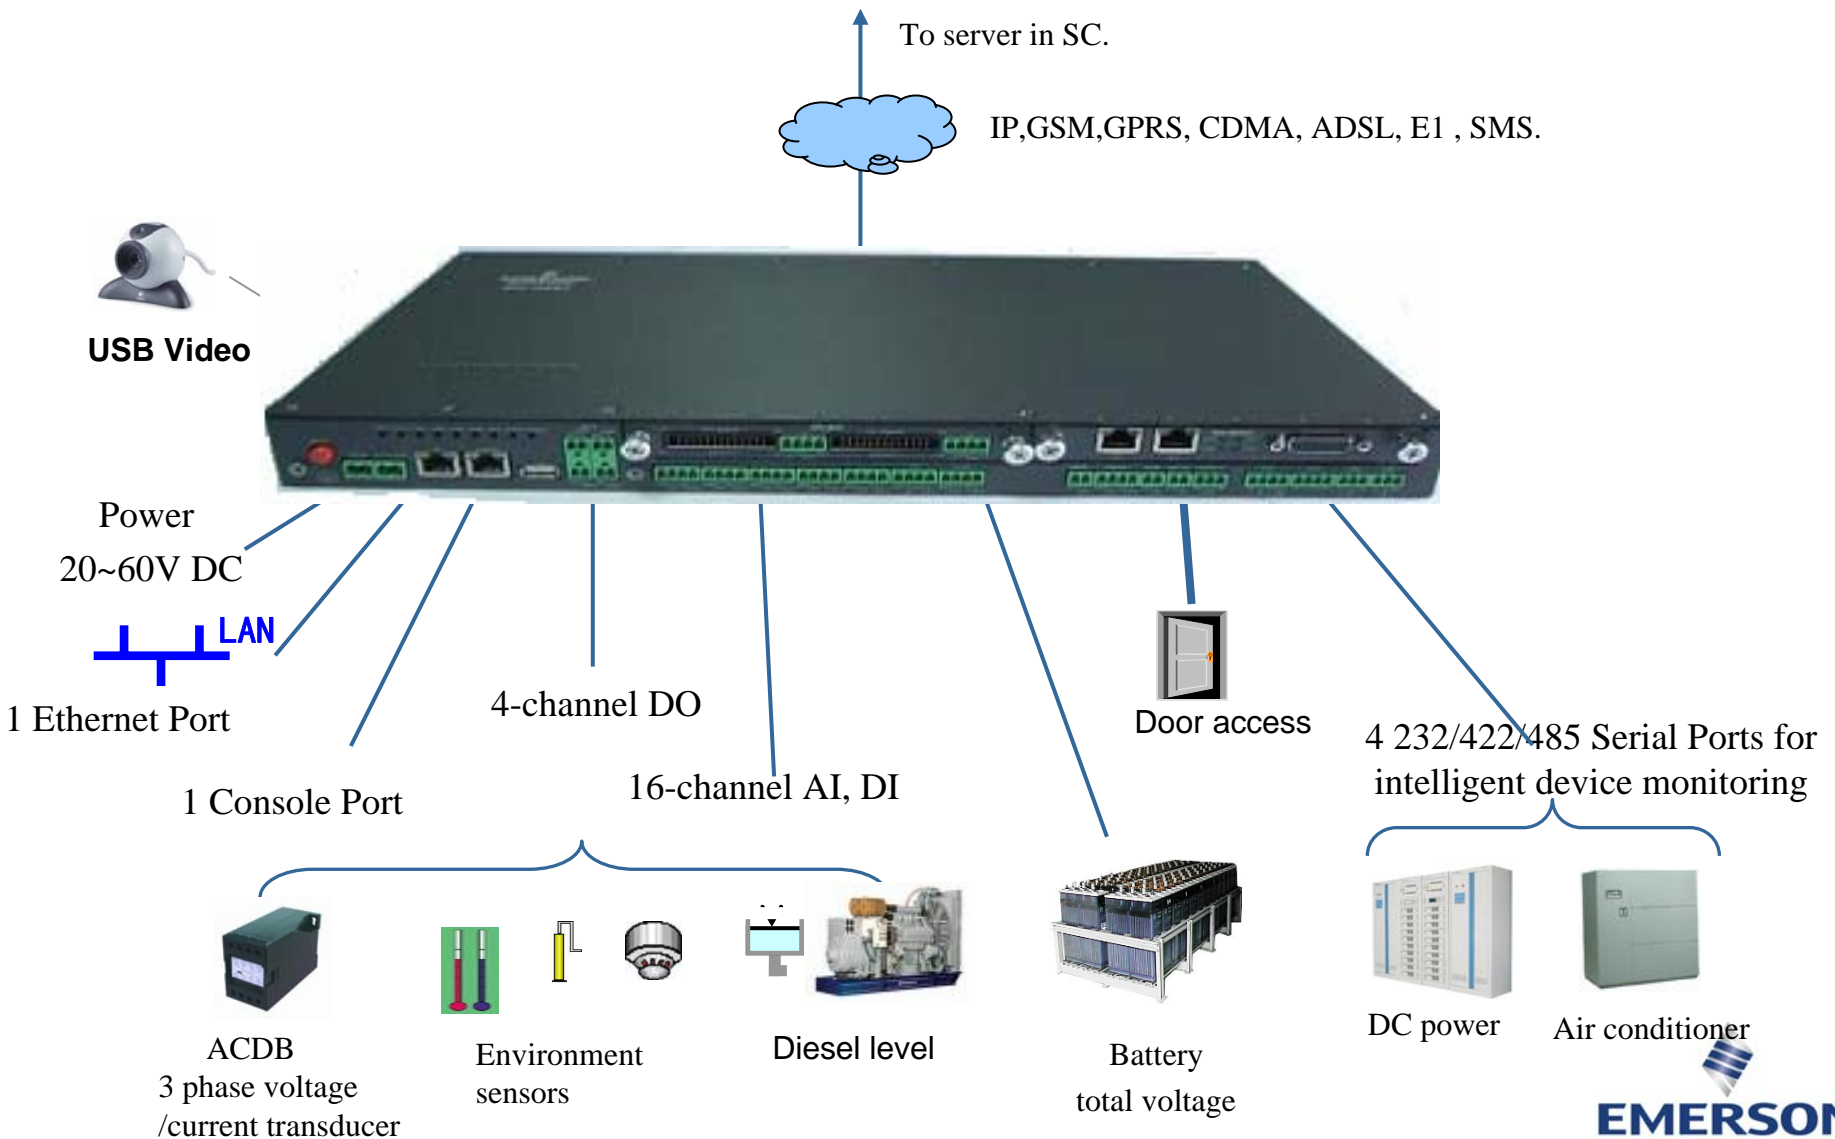

## Non-Intelligent PAC

Temperature  
Humidity sensor

# BTS solution

# IDU Family

## ✓ IDU-Host

- 16-channel DI/AI inputs
- 4 relay outputs
- 4 serial ports, maximum 8 with an IDU-COM
- Monitoring 1 or 2 battery strings with a IDU-BAT
- Ethernet communication
- 2 extended slots all kinds of functional card
- 1 USB port
- I2C interface for low cost temperature & humidity sensor connecting

## ✓ IPLU1202

- 6 General IO
- 1 Battery String Total Voltage
- 1 DO
- 1 I2C Temperature and Humidity Sensor Interface
- 2 Intelligent Serial Ports
- Ethernet Communication
- E1 Communication
- 1 USB Video

# Capacity of PSEM Using IDU

# Functions of Software

# Functions of PSEM software

## Electronic site map and free navigation

Simply and exactly remote on- line configuration, monitoring and trouble ticketing

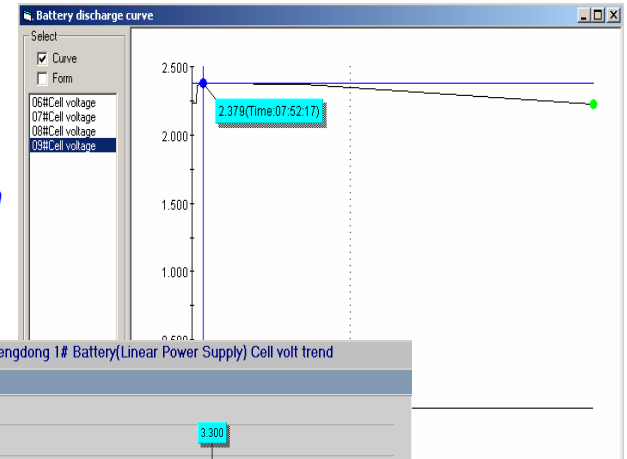

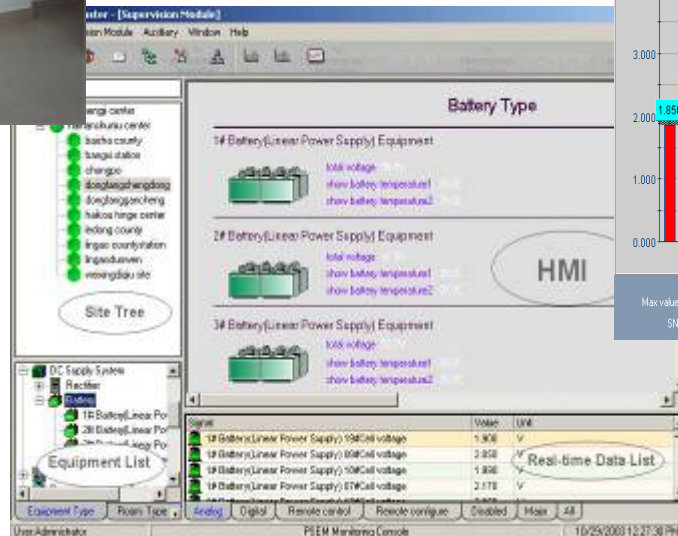

**Real time monitor all sites and equipments simultaneously**

# Functions of PSEM software

## Advanced battery management

*Battery capacity*  
*Battery backup time calculation*  
*Battery charge / discharge test*  
*Lag-behind battery checking*  
*Battery cable anti-theft*

**Outage power allocation such as intelligent distribution of Gen-sets when input power outage happens**

# Functions of PSEM software

Facility trouble shooting expert system

3<sup>rd</sup> party maintenance compliance management

The image displays three screenshots of the PSEM software interface. The top-left screenshot shows the 'Alarm Management Module' with a table of alarms. The top-right screenshot shows the 'PSEM work-order' form. The bottom screenshot shows a 'PSEM Monitoring Console' window.

**Alarm Management Module -- Total alarms: 326; After Filtering: 326**

PSEM can smoothly connect to 3rd party work flow trouble ticketing system

# Functions of PSEM

**Preventive/predictive maintenance by data statistics and analysis**

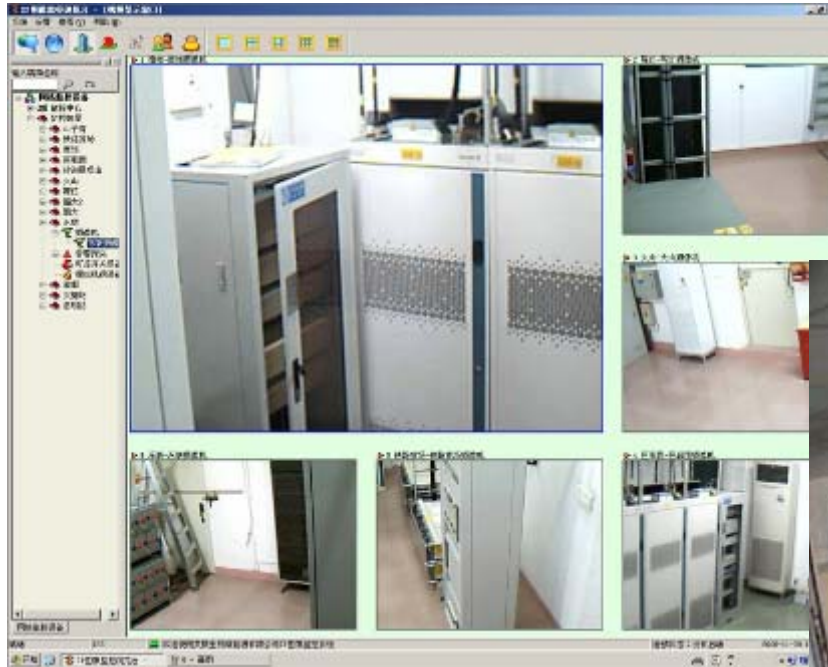

**Equipment life cycle and asset management**

**Efficient tools for backup power system / network optimization**

# Functions of PSEM

Economic video system for theft control and personnel compliance management

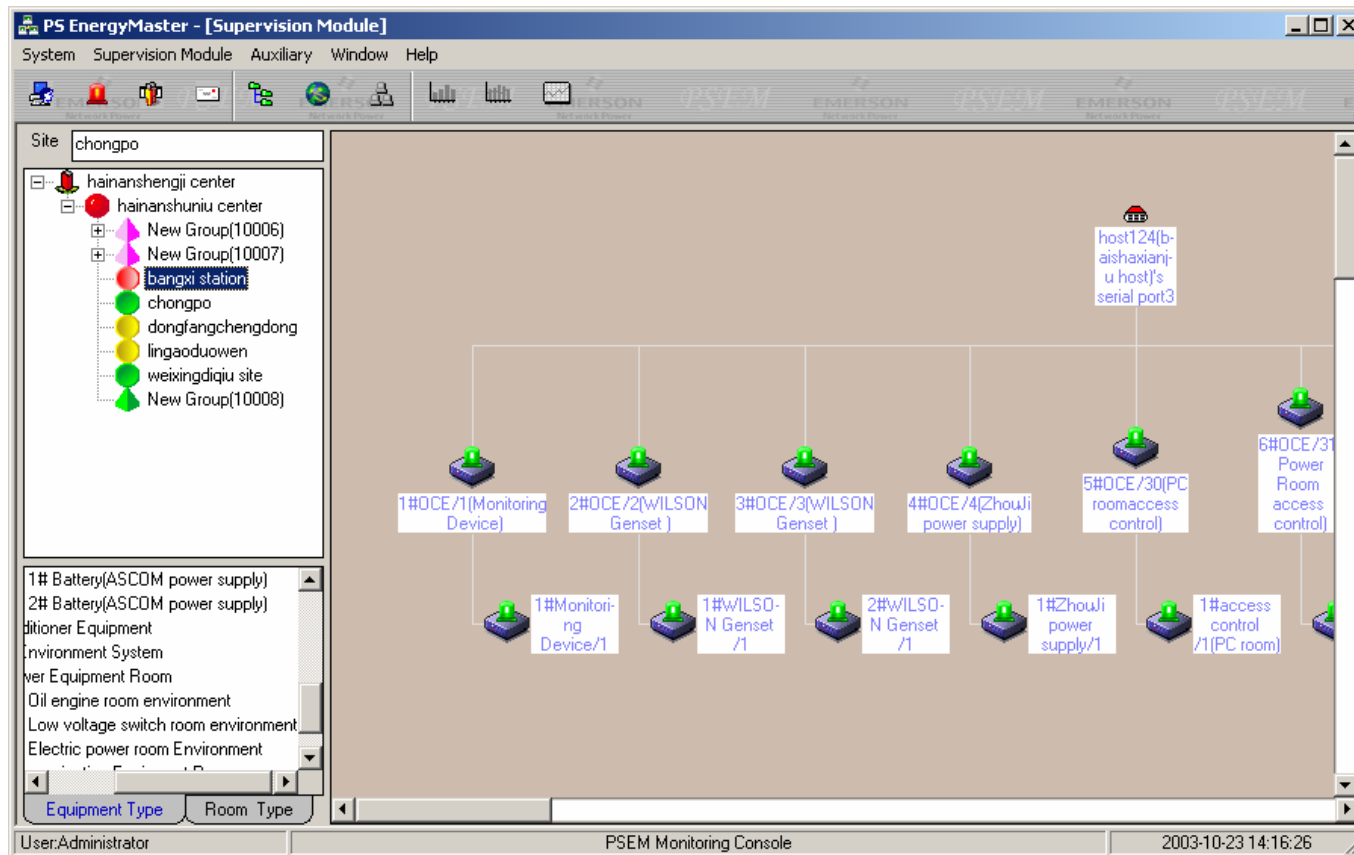

*Both USB camera and IP camera are available*

*Current CCTV integration by using original camera*

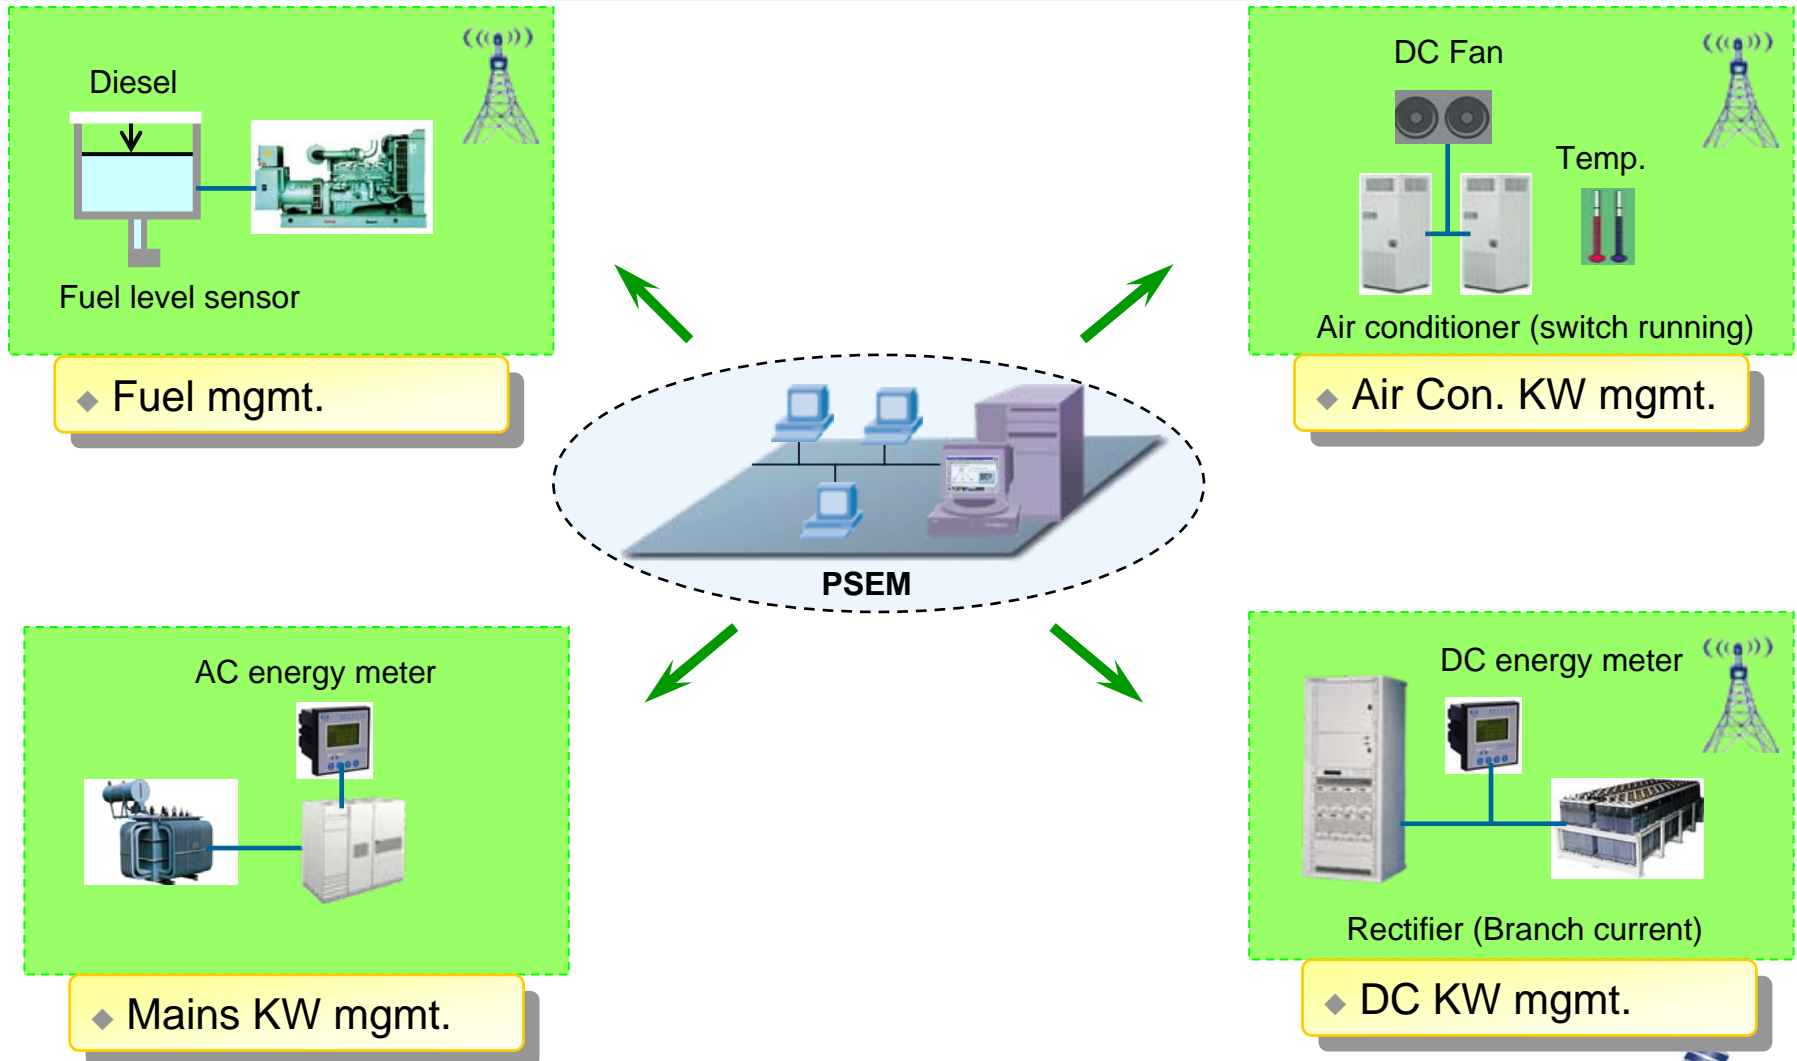

# Functions of PSEM

*Self-diagnosis help to ensure the stability of system*

# Functions of PSEM---Energy management

# Diesel consumption management

Diesel Consumption:

$$\Delta V = (h1-h2) * S$$

	month				
running times	1	2	3	.....	n
Diesel (liter)	L1	L2	L3	.....	Ln

site \ month	1	2	3	.....	12
BTS1	L1	L2	L3	.....	Ln
BTS2	L1	L2	L3	.....	Ln
BTS3					
⋮					

# Air conditioner management

Flexible field logic control strategies

Efficient energy cost cut-off solutions

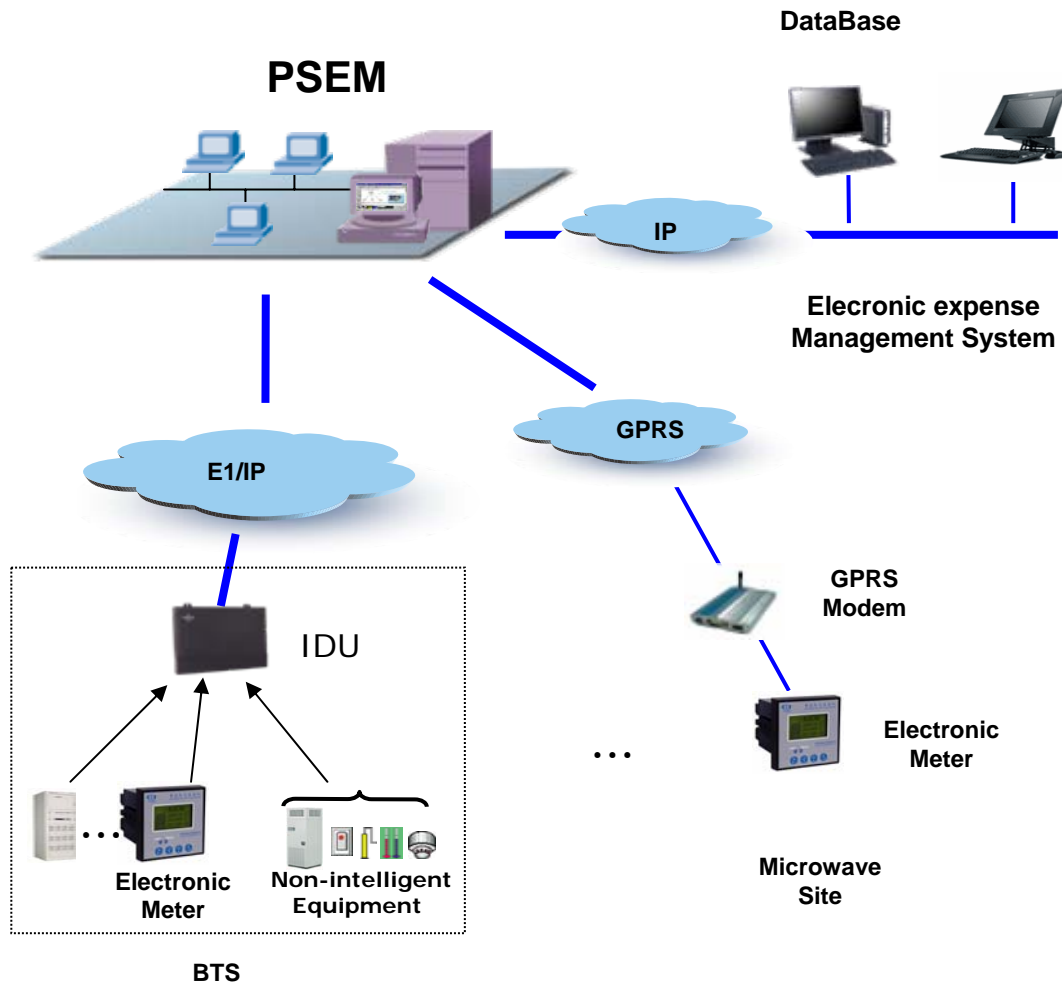

Energy Saving Mode

Temp	AC 1	AC 2	DC Fan
Mains failure	0	0	1
Over 35°C	0	0	1
28°C - 35°C	1	1	0
23- 28°C Switch running	0	1	0
	1	0	
running Based on °C	28 °C on	23 °C off	0
Below 23 °C	0	0	0

*Optimize set-point to control air conditioners to reduces energy cost for AC by 15% per site per year*

# Mains/DC bill management

- ◆ BTS site management
- ◆ Payment management
- ◆ Statistics
- ◆ Pre-alarm (arrear, rent at term, abnormal electricity expense)
- ◆ System management
- ◆ User management

5. Application of PSEM
6. Roadmap

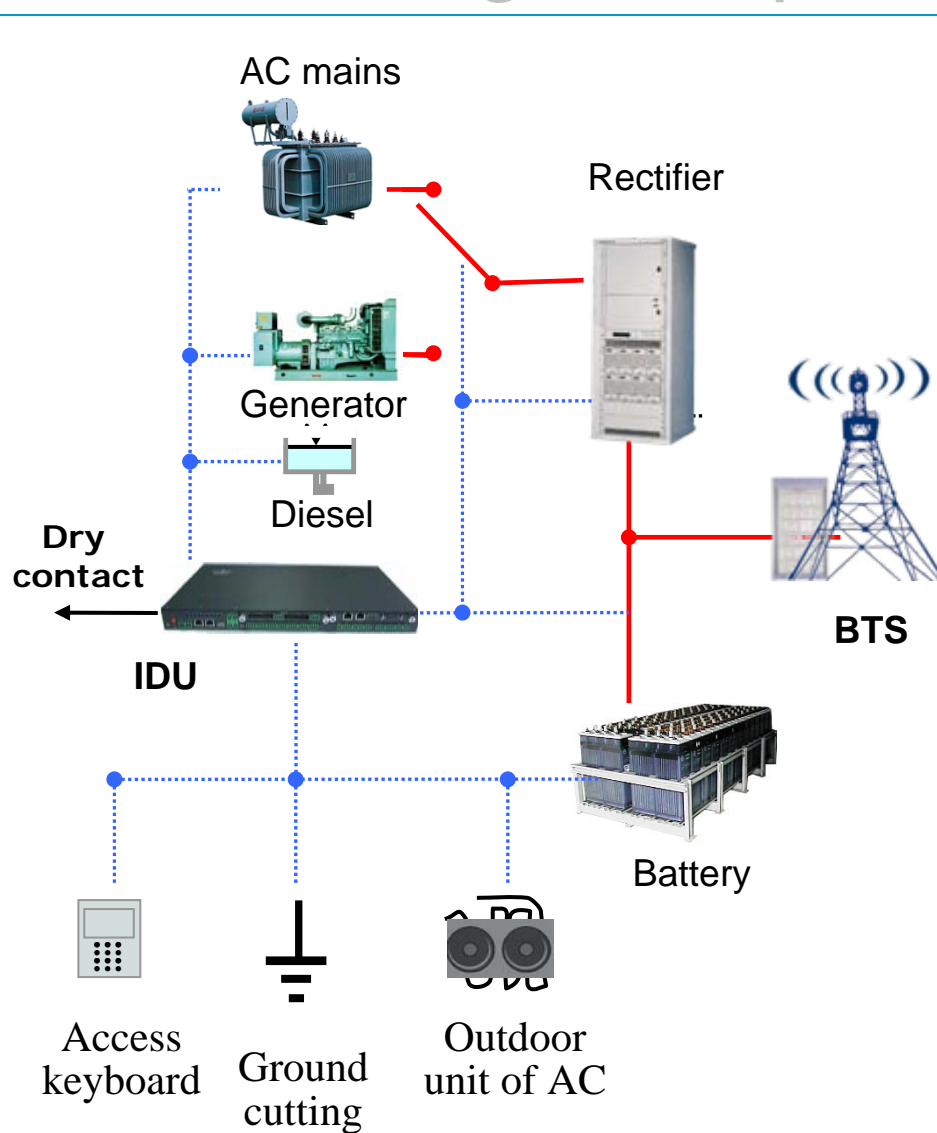

# Power management ( Telstra in Australia )

DCV	Day		Night	
	54->48V	<48V	54->48V	<48V
Generator	0	1	0	1
Solar	1	1	0	0
Battery	0	0	1	0

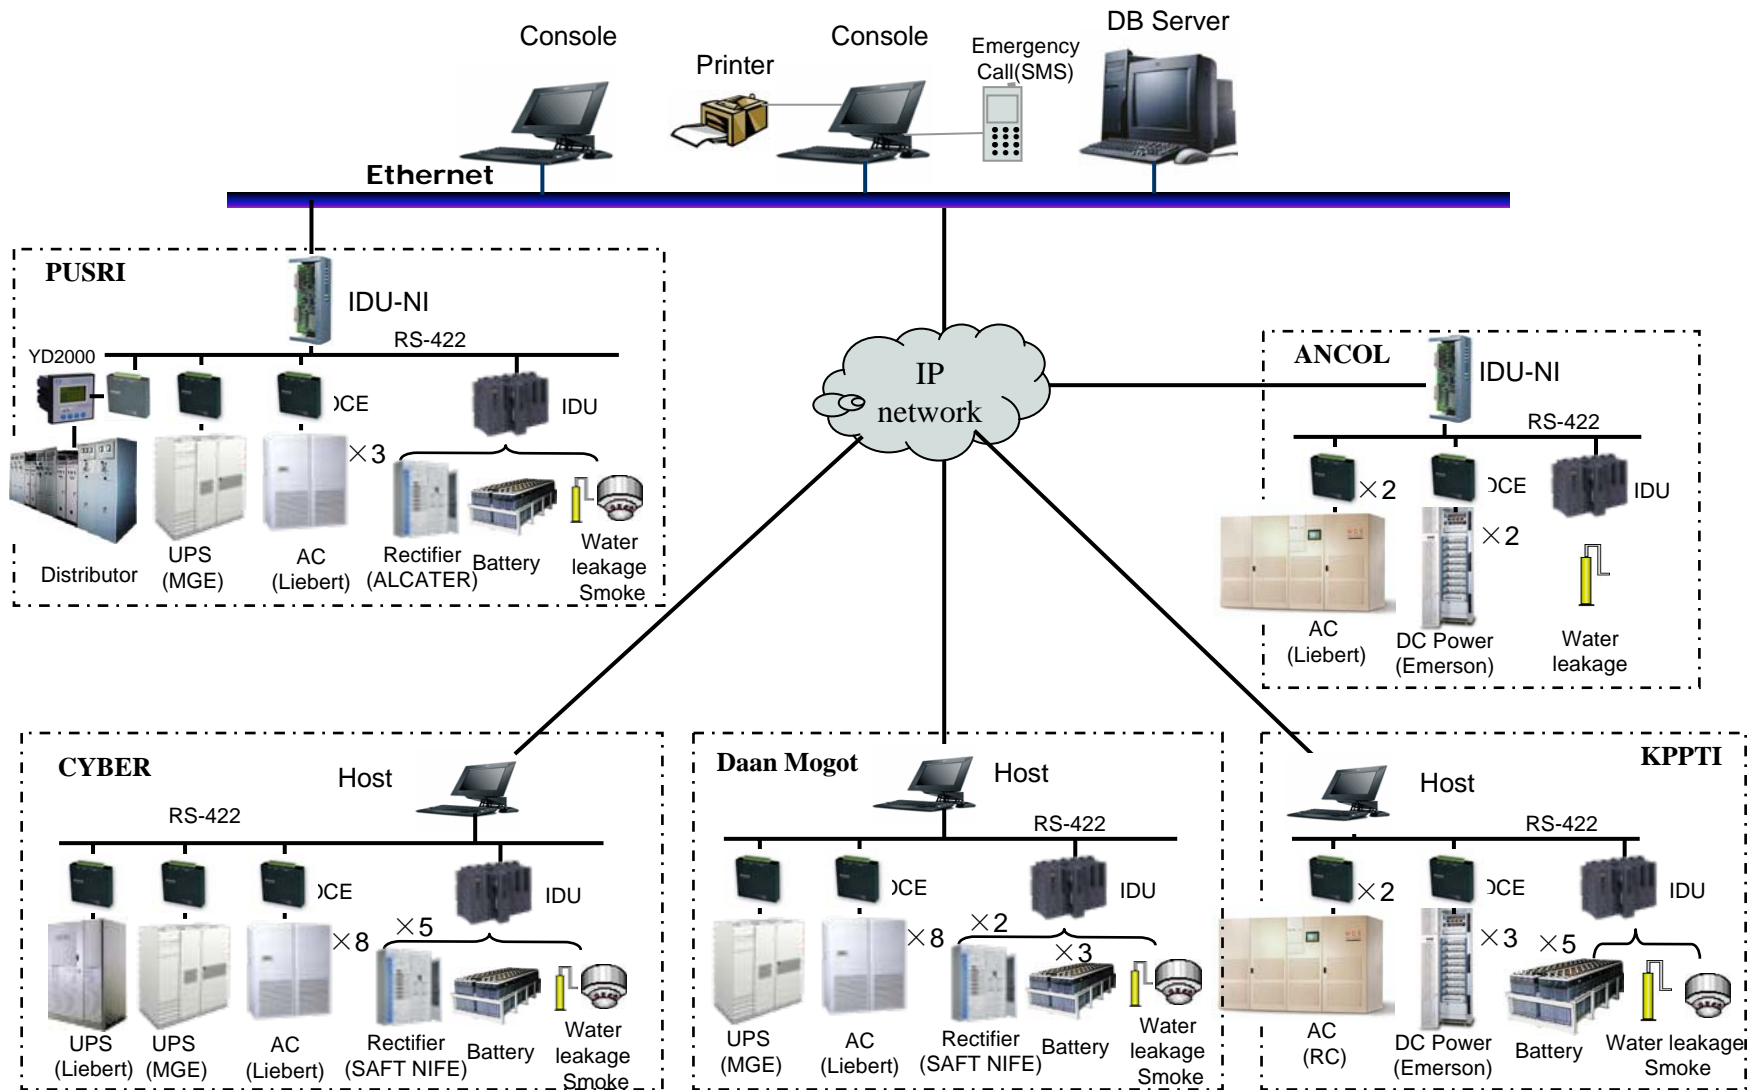

# Power management (PT Win in Indonesia)

	Normal	Mains failure/ Phase trip	Trigger Alarm
Mains	1	0	0
Generator	0	1	1
Door open expired			1
Temperature over 35 °C			1
Fuel tank empty			1
Arrester failure			1
AC outdoor unit removed			1

# Example---Indosat (Indonesia)

# Case Study – CMCC (Jiangsu)

Location: East of China

Area: 102,600 km<sup>2</sup>

Population: 75,495,000

GDP(2006): USD 282 billion (3rd)

Per capita: USD 3,775 (5th)

Growth rate of GDP: 15.4%

Capital: Nanjing

Prefecture-level: 13 divisions

Mobile penetration: 51%

# Case Study – CMCC (Jiangsu)

## Company Overview:

1. BTS number: Over 14,712.
2. Subscriber: Over 30 million.
3. Revenue(2006): USD 2.5 billion
4. Market share: 80%

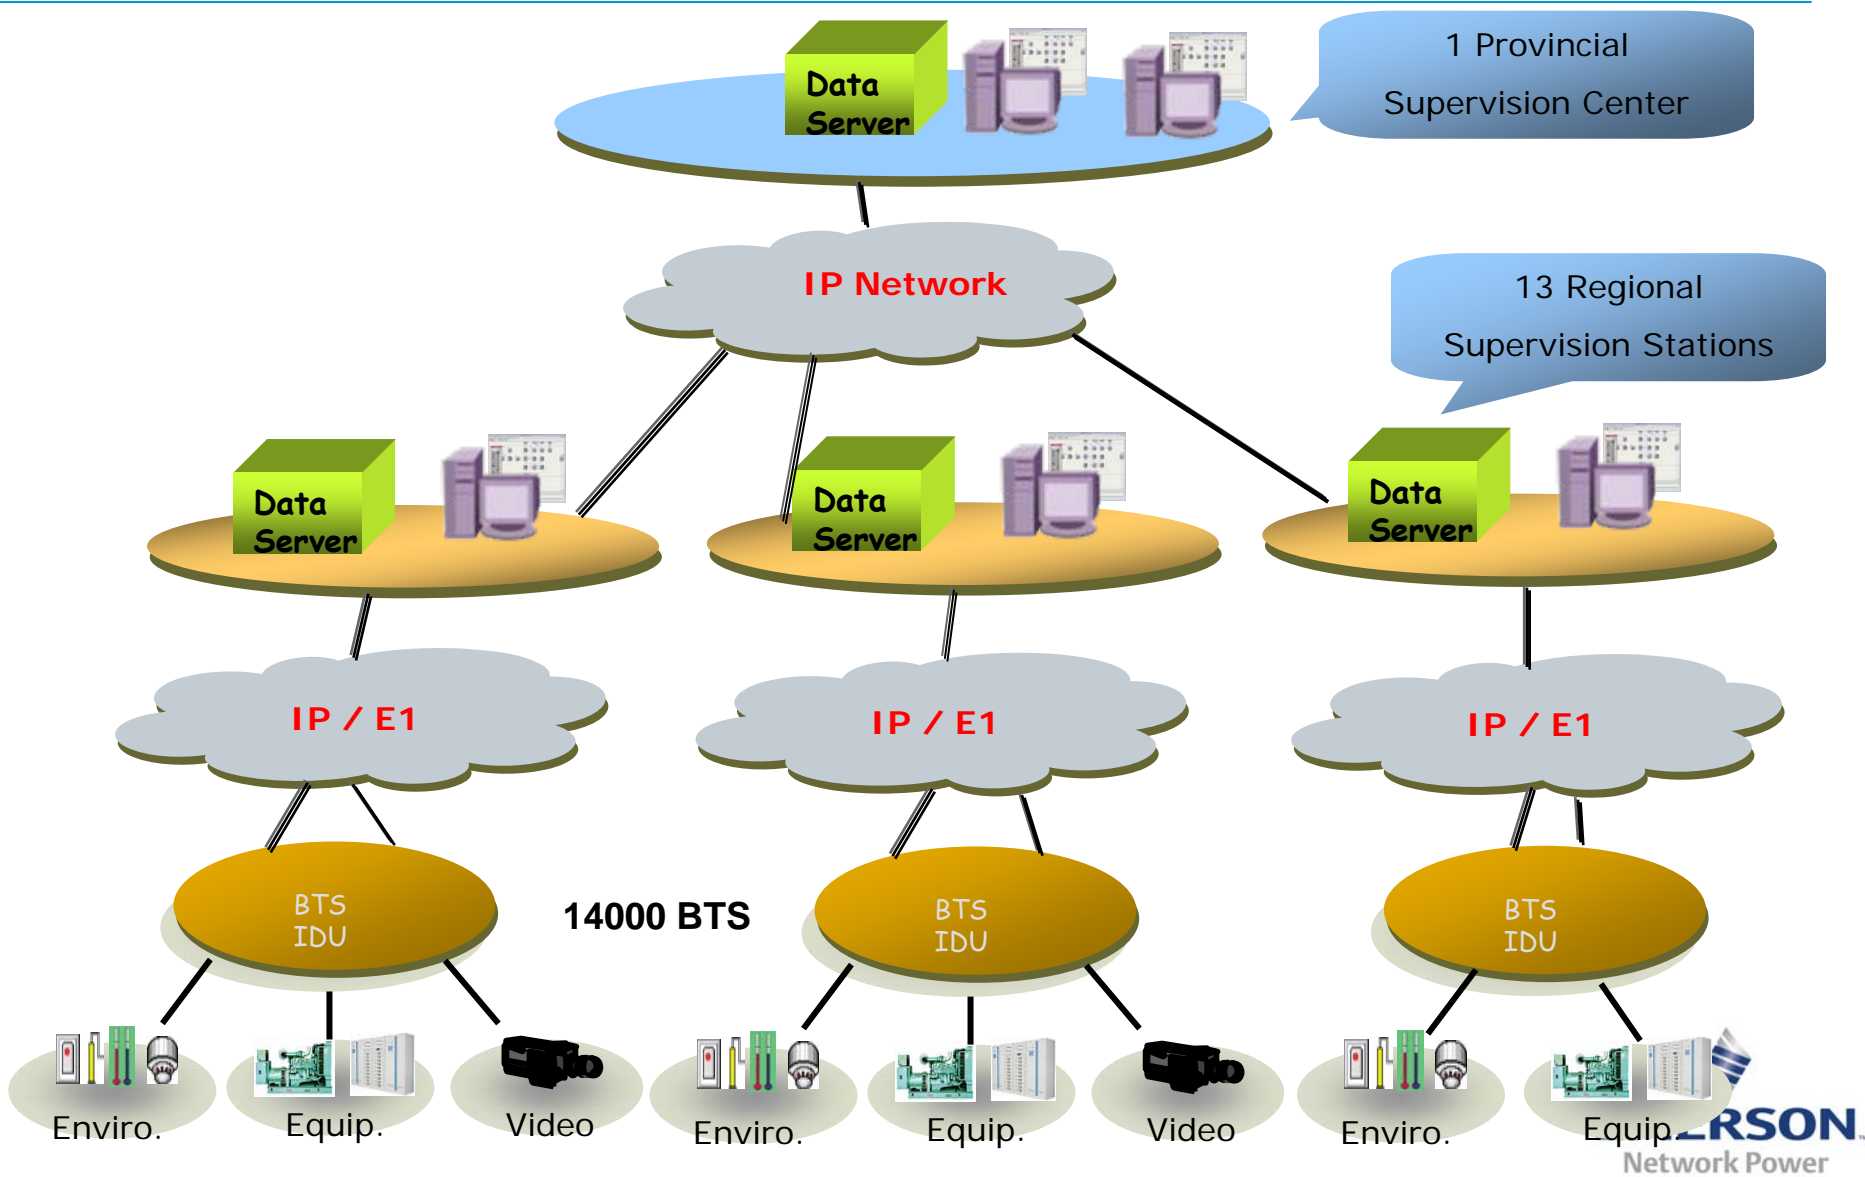

## Monitoring Overview:

1. One Supervision Center
2. 13 regional Supervision Station
3. BTS sites monitored: 14,000+.
4. Monitoring penetration: 98%

City / Region	BTS No.
Suzhou	2352
Nanjing	2023
Nantong	1122
Yancheng	1128
Xuzhou	1135
Yanzhou	752
Taizhou	719
Huai'an	683
Zhengjiang	674
Changzhou	1023
Lianyungang	803
Suqian	796
Wuxi	1502
<i>Total</i>	14712

*Over 11,000 sites built by Emerson.*

# Monitoring Network Topology

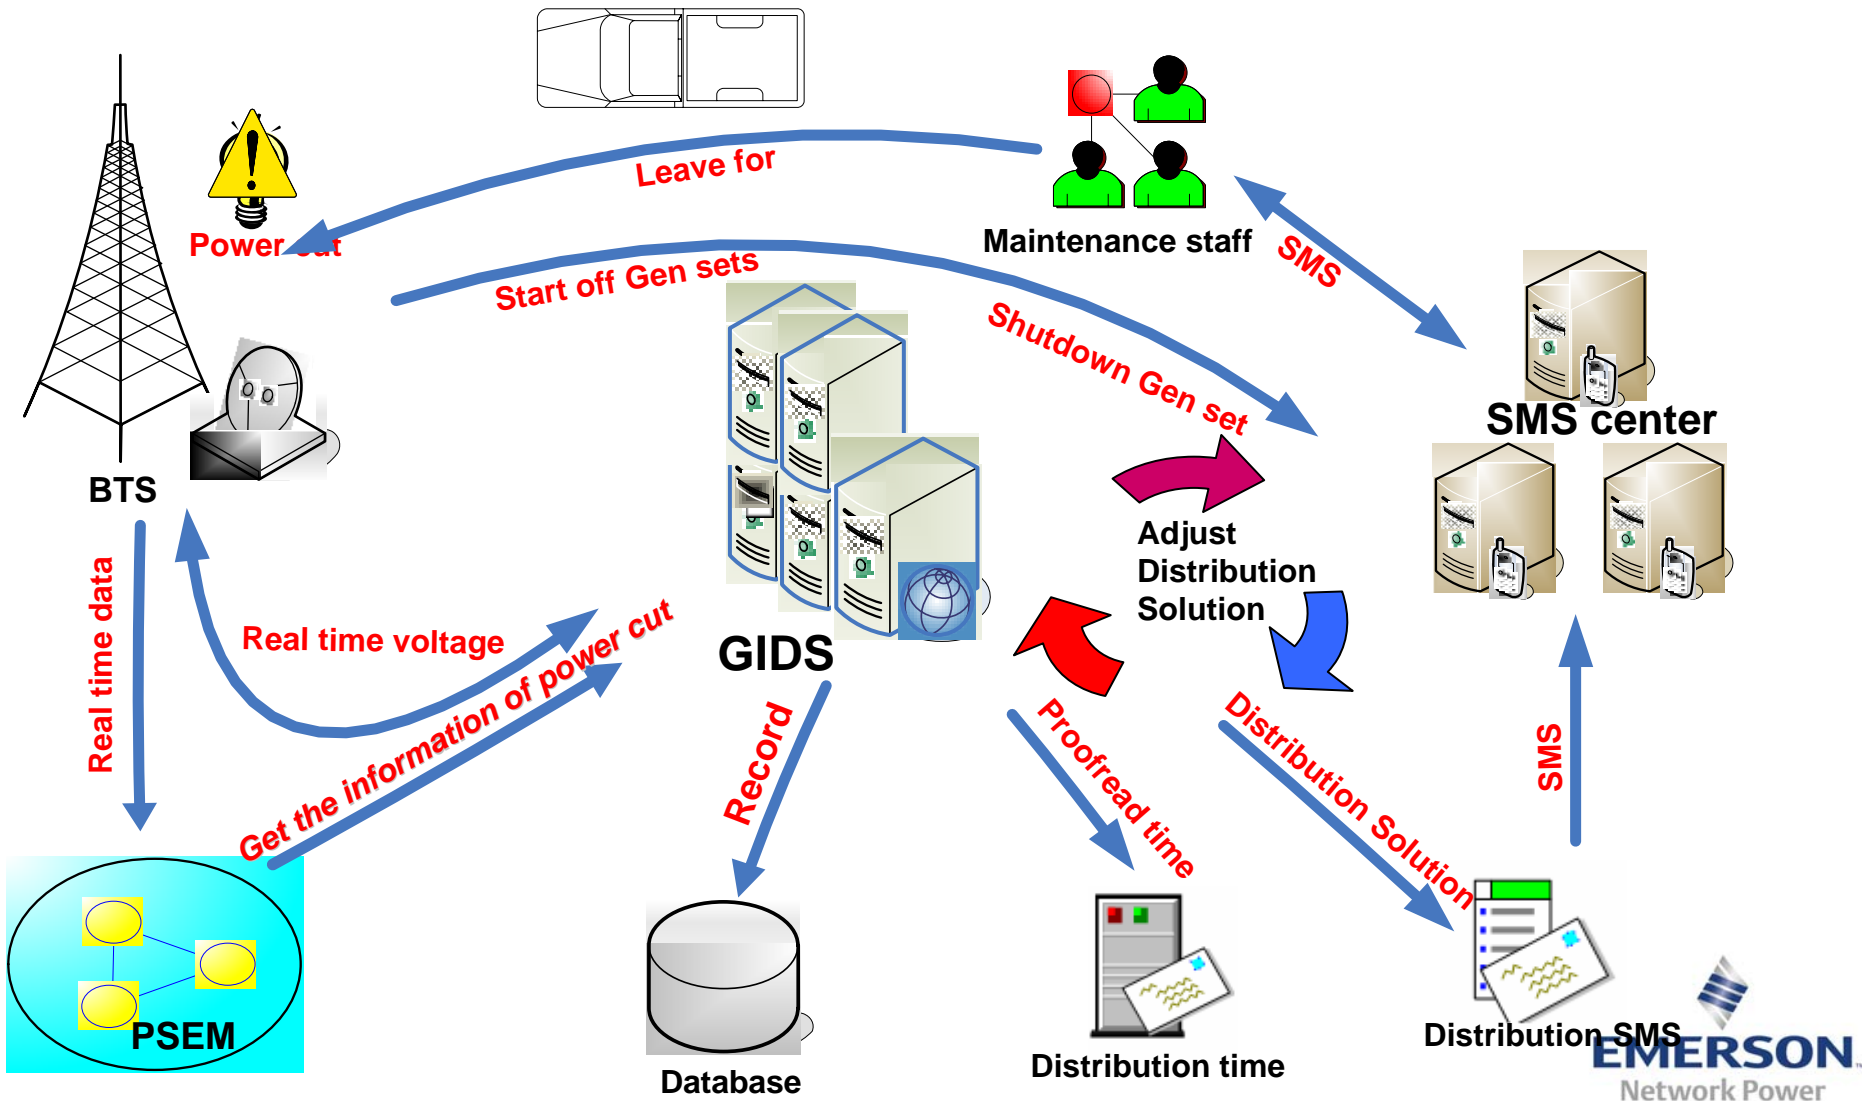

# Monitoring for Base Station (BTS)

- The highest position of BTS monitored is on Everest .  
(Altitude 6500 meter)

# Business application

## Gen-sets Intelligent Distribution System (GIDS)

# Shares in China Telecom marketing

- Total 872 suits of monitoring system of PSEM be used for 109572 sites monitored until May,2007.

# PSEM System Development Roadmap

---

***Thank you***
